### 1. We're financial well behaving

Here in Denmark so

On the budget cost we're saving

Keeps expenses low.

Save cost of labour, production outsource  
our best financial force.

More unemployment for workers we see,  
but financial not bad it will be.

In the lost industry field,  
they can shops and houses build,  
and a boom in building industry it surely bring us will.

From imports we much can buy,  
and much cheaper prices pay,

where environment- and labour rules don't have not so much to say.

### 2. State and all administrations

Cut down more still more.

While the North Sea waves' erosion

Eats of Denmark's shore

Helpers to old and to disabled are cut

sewers and road's budgets cut

Who can indeed be permitted to pay?

Without being accused to betray.

Railway tracks are very worn

a bit welding melted on

soon the new I C four trains on them so carefully can run

With a smile it all we face

Our taxes will not rise

If the train is not on time we just our car can drive instead

3. Gross domestic product rising  
we in Denmark should,  
if we would be realizing  
future welfare good.  
Lot of commercials we get every day.  
Buy now and much later pay.  
Tax on consume gives good income to state  
Even more when the oil price is high.  
When we cheaply much import,  
shops and stores earn more and more  
Gross domestic product rise when all of us are using more  
If a new car we will buy, also tax to state must pay  
In our houses cheap can borrow in a very easy way

4. Say no to euro and union  
Here in Denmark so  
keep our national small nation  
We intend to do  
We will in Denmark it all self decide  
We have a sovereign state  
With luck and smartness we hope anyway  
To get more from EU than we pay  
We have car and modern house  
We have fashion style of course  
And by satellite much radio and TV we can choose  
Still more inequality  
not more worried we'll be  
On vacation trip we very cheap can buy much luxury
